

ASG SageNote™ Library Consolidated Table of Contents

SageNotes™ are two to four page research papers that focus on best practices, decision frameworks, tactical guidelines, case studies, events, strategic planning, and tutorials. SageNotes serve as key reference documents for many of the AR frameworks and best practices explored in ASG’s strategic analyst relations and operational effectiveness research.

This document compiles the table of contents for the ASG SageNotes™ Library.

SageNote™ AR152

AR and Sales: Dealing with Changing and Proliferating Magic Quadrants

SageNote Series: Purchasing Analyst Services

Over \$100 million is wasted annually by IT vendors buying the wrong services at the wrong price from IT analyst firms. Buying the right IT industry analyst services is easier said than done. With the right process, you can ensure the best value for your money, and avoid costly mistakes. In this SageNote Series, we outline a step-by-step process to follow when buying IT analyst services and maximizing the value from those contracts.

Analyst Firms Consulting Groups: The Landscape

SageNote™ AR93
Influencing Analyst Firm Consultants

SageNote Series: Analyst Firms' Consulting Groups

Most IT industry analyst firms offer consulting services in addition to their research and advisory services. The consultants at these firms play a distinct role in the influencer game, and that role is currently expanding as firms strive to grow revenues from their consulting business. This SageNote series presents background on the analyst firms' consulting groups.
